Wendover Air Force Base,
Squadron Hangar (also-
(Maintenance Hangar)
(Building No. 821)
HABS No. UT-125-R
Page 1

Built in 1943, this building closely resembles bldgs. #412, #800 and #811. Like #811, this is a "Mobilization," "Semi-Permanent" (O.B.H.-2) type of construction built out of plan 117/6-1 by H & D. for a cost of \$175,000.00. The original building contained 12, 890 square feet.

Building 821 has a concrete foundation and floor, wood frame wall construction and a truss roof. The bottom of the truss is 25 feet-10 inches above the floor. The basic building measures 80 feet-2 inches by 122 feet-3 inches, with a 16 foot by 86 foot-8inch offset in the rear (north) and two 7-foot-9-inch by 14 foot-4 inch closets for the sliding doors, one each at the southwest and northwest corners.

Like the other hangars, this one is clad with horizontal wood siding, has asphalt roll roofing and contains the same interior equipment and furnishings as the others built from the same plans. The building has not been painted or otherwise maintained in many years. Still, it appears to be in good structural condition.
